

**Position: Web/Database Designer/Developer**

ThinkInteractive is currently looking for one or more web designers/developers to work part-time on various projects using IIS/.NET/MSSQL. While there are no “guaranteed” hours with this position, we have regular projects that are constantly in need of completion. We are willing to take on more than one person if you are particularly strong in one or more of the following qualifications but do not meet them all.

**Qualifications: Required**

- 1 year of web design and development experience, including HTML, CSS
- 1 year of experience with .NET 2.0 and MS SQL
- Working knowledge of MS Access
- Working knowledge of Photoshop
- Have own computer/laptop with high speed Internet (most work will be done remotely, you will not have to come in to an office)

**Qualifications: Preferred**

- 2 years of web design and development experience, including HTML, CSS
- 2 years of experience with .NET 2.0 and MS SQL
- 1-2 years of experience with DotNetNuke
- 1-2 years of experience with MS Access
- Working knowledge of Photoshop and/or Illustrator

**Hours**

The hours will vary, but a typical project will require between 5-15 hours to complete, with some larger, longer-term projects needed on occasion.

**Salary**

\$20-\$30/hour DOE

**Please submit your resume to:**
