TechSmith's SnagIt Outputs Screenshots to Microsoft® Visual Studio® Team System

Okemos, MI – May 8, 2007 - TechSmith Corp., the world's leading provider of screen capture and recording solutions, today announced the release of its SnagIt accessory for Microsoft Visual Studio Team System, giving developers a fast and easy way to communicate bug reports and tasks with screenshots. The new Certified for Vista version of SnagIt with the Team System output accessory will be available in TechSmith's booth (425, 427) at Microsoft Tech-Ed 2007, taking place June 4-8, in Orlando Florida.

With SnagIt's output to Team System, developers can forego lengthy text descriptions or image attachments. SnagIt can automatically attach the screenshot to the chosen work item in the image format selected. SnagIt enables computer users to take screenshots of exactly what they see on their screens to communicate ideas faster, explain concepts clearly, and archive electronic information with point-and-click convenience.

“SnagIt has been a favorite among developers, product managers, designers and quality assurance professionals for a long time,” said Tony Dunkel, SnagIt product manager at TechSmith. “These customers will immediately recognize the productivity benefits SnagIt brings to reporting and tracking tasks. The new Team System accessory will help streamline the application development process significantly.”

SnagIt is the world's most popular screen capture software with more than seven million users worldwide. With SnagIt, users can capture, edit and share any image, including scrolling windows, objects, menus, video, text, and Web pages and include them in emails and instant messages, PowerPoint presentations, MS Office documents, marketing and sales materials, technical documentation, websites and blogs.

System Requirements and Availability

SnagIt 8.2.3 supports Microsoft Windows 2000, Windows XP, XP x64 and Windows Vista. SnagIt 8.2.3 can be downloaded immediately at www.techsmith.com. SnagIt's Visual Studio Team System accessory can be downloaded at <http://www.techsmith.com/snagit/accessories/teamsystem.asp>. The suggested retail price of SnagIt is \$39.95 for a single-user license. SnagIt accessories are free. For additional information, visit: <http://www.techsmith.com/snagit.asp>.
