After reading the two papers:

Write a 1-page critique (singlespaced, 11pt, 1inch margins) that covers the two following points:

1. Summary and description of the key techniques and/or process currently used for requirements engineering.

2. Summary of the future directions of requirements engineering.

Please organize your writeup carefully. Be sure to proofread for content, flow, and typographical errors. Presentation of your writeup will count for at least 25% of the overall grade for this assignment.
