Spring Semester, Dr. Punch. Exam #2 (03/28), form 2 D

Last name (printed): __________________________________________________________

First name (printed): _______________________________________________________

Directions:

a) DO NOT OPEN YOUR EXAM BOOKLET UNTIL YOU HAVE BEEN TOLD TO BEGIN.
b) You have 90 minutes to complete the exam (7:00pm – 8:30pm)
c) This exam booklet contains 30 multiple choice questions, each weighted equally (5 points). **5, double-sided pages total**
d) You may use one 8.5" x 11" note sheet during the exam. No other reference materials or calculating devices may be used during the examination.
e) Questions will not be interpreted during the examination.
f) You should choose the single best alternative for each question, even if you believe that a question is ambiguous or contains a typographic error.
g) Please fill in the requested information at the top of this exam booklet.
h) Use a #2 pencil to encode any information on the OMR form.
i) Please encode the following on the OMR form:
   - Last name and first initial
   - MSU PID
   - Exam form (see the title of this page)
j) Please sign the OMR form.
k) Only answers recorded on your OMR form will be counted for credit.
l) Completely erase any responses on the OMR form that you wish to delete.
m) You must turn in this exam booklet and the OMR form when you have completed the exam. When leaving, please be courteous to those still taking the exam.

Good luck.

**Timing tip.** A rate of 2.5 minutes per multiple choice problem leaves 5 minutes to go over any parts of the exam you might have skipped.
#include <iostream>
using std::cout; using std::endl;
#include <map>
using std::map;
#include <string>
using std::string;

long fn1 (map<string, long>& m) {
    long result = 0;
    for (auto e : m) {
        result += e.second; // Line 1
    }
    return result;
}

long fn2(map<string, long>& m, string str, long lng) {
    auto i = m.find(str); // Line 2
    if (i != m.end())
        i->second += lng;
    else
        m[str] = lng;
    return m[str];
}

int main (){
    map<string, long> m { {"bill", 1}, {"fred", 2}, {"jane", 3} };
    cout << fn1(m) << endl; // Line 3
    cout << fn2(m, "ginger", 0) << endl; // Line 4
    cout << m.size() << endl; // Line 5
    cout << fn2(m, "bill", 5) << endl; // Line 6
}

Figure 2

1) For the program in Figure 2, what type is \texttt{e} on Line 1.
   a) char
   b) map\textless string, long\textgreater ::iterator
   c) map\textless string, long\textgreater *
   d) string
   e) None of the above

2) For the program in Figure 2, what type is \texttt{i} on Line 2.
   a) char
   b) map\textless string, long\textgreater ::iterator
   c) map\textless string, long\textgreater *
   d) string
   e) None of the above
3) What output is produced by Line 3 of Figure 2?
   a) 3  
   b) 4  
   c) 5  
   d) 6  
   e) None of the above

4) What output is produced by Line 4 of Figure 2?
   a) 3  
   b) 4  
   c) 5  
   d) 6  
   e) None of the above

5) What output is produced by Line 5 of Figure 2?
   a) 3  
   b) 4  
   c) 5  
   d) 6  
   e) None of the above

6) What output is produced by Line 6 in Figure 2?
   a) 3  
   b) 4  
   c) 5  
   d) 6  
   e) None of the above
For the program in Figure 3, what type is \( i \) on Line 1.

a) vector<long>

b) string

c) long

d) char

e) None of the above
8) What output is produced by Line 2 in Figure 3?
   a) true
   b) false
   c) 0
   d) 1
   e) None of the above

9) What output is produced by Line 3 of Figure 3?
   a) 2
   b) 3
   c) 4
   d) 5
   e) None of the above

10) What output is produced by Line 4 of Figure 3?
    a) 2
    b) 3
    c) 4
    d) 5
    e) None of the above

11) What output is produced by Line 5 of Figure 3?
    a) 2
    b) 3
    c) 4
    d) 5
    e) None of the above

12) What output is produced by Line 6 of Figure 3?
    a) 2
    b) 3
    c) 4
    d) 5
    e) None of the above

13) What output is produced by Line 7 of Figure 3?
    a) empty string
    b) 1, 2, 3, 4, 5,
    c) 1:2:3:4:5
    d) 1:2:3:4:
    e) None of the above
14) For the program in Figure 4, what value is printed by Line 1?
   a) 0
   b) 1
   c) 2
   d) 3
   e) None of the above
15) For the program in Figure 4, what value is printed by Line 2?
   a) 0
   b) 1
   c) 2
   d) 3
   e) None of the above

16) For the program in Figure 4, what value is printed by Line 3?
   a) 11
   b) 10
   c) 6
   d) 0
   e) None of the above

17) For the program in Figure 4, what value is printed by Line 4?
   a) 0
   b) 1
   c) 2
   d) 3
   e) None of the above

18) For the program in Figure 4, what value is printed by Line 5?
   a) empty string
   b) 0x**2 + 0x + x
   c) 1x**2 + 2x + 3
   d) 3x**2 + 2x + 1
   e) None of the above
Figure 1

19) What output is produced by Line 1 in Figure 1?
   a) 1
   b) 2
   c) 3
   d) 4
   e) None of the above.
20) What output is produced by Line 2 in Figure 1?
   a) 1
   b) 2
   c) 3
   d) 4
   e) None of the above.

21) What output is produced by Line 3 in Figure 1?
   a) 1
   b) 2
   c) 3
   d) 4
   e) None of the above.

22) What type is result on Line 4 in Figure 1?
   a) vector<long>
   b) long
   c) int
   d) string
   e) None of the above.

23) What output is produced by Line 5 in Figure 1?
   a) 1
   b) 2
   c) 3
   d) 4
   e) None of the above.

24) What output is produced by Line 6 in Figure 1?
   a) 3
   b) 4
   c) 5
   d) 8
   e) None of the above.

25) What output is produced by Line 7 in Figure 1?
   a) 6
   b) 5
   c) 4
   d) 8
   e) None of the above.
26) Which of the following clears the input buffer cin of all remaining input?
   a) cin.clear
   b) cin.ignore
   c) cin.reset
   d) All of the above
   e) None of the above

27) Which of the following is true about an ostringstream variable sout?
   a) you can output to sout using << operations.
   b) it is a string so you can concatenate to it, for example sout + "my string".
   c) you cannot use format manipulators, for example sout << setprecision(4) is not allowed
   d) All of the above.
   e) None of the above.

28) What is meaning of the keyword auto in a type declaration?
   a) Can determine a variable's type at run time.
   b) Does not actually set a variable's type. It is a way around the type system.
   c) Is restricted to only built-in types like long or string.
   d) All of the above
   e) None of the above

29) Which of the following generic algorithms allows you to modify their "standard operation" by adding a function of your own design?
   a) sort
   b) accumulate
   c) transform
   d) All of the above
   e) None of the above

30) What does =delete mean at the end of a constructor declaration?
   a) that constructor is not allowed
   b) that constructor is deleted in the header but is defined elsewhere
   c) that constructor cannot take any arguments (it is a default constructor)
   d) that constructor is a delete constructor, it deletes elements from the class
   e) None of the above
