This assignment focuses on the software process models.

Read *Managing the Development of Large Software Systems* by W. Royce, *A Spiral Model of Software Development and Enhancement* by B. Boehm, and *Agile Software Process and Its Experience* by M. Aoyama. Based on your reading and discussion in lectures, define each of the following process models and their steps. Then compare and contrast the advantages and disadvantages of each and how each model handles changes to requirements.

Process Models

1. Waterfall
2. Spiral
3. Agile
