This assignment focuses on understanding software requirements.

After reading Chapter 7 of the textbook, answer the following questions (from the book, included here for your convenience):

1. (7.3) Discuss some of the problems that occur when requirements must be elicited from three or four different customers.

2. (Variation of 7.5) [Note: Modified from the original textbook question.]
   Create a use case model for using an ATM. Your use case should cover at least three services, including banking withdrawal. Make use of at least one "includes" and one "extends" link in your use case model. Enumerate the requirements and use the template provided on the CSE435 website to describe your use case.

   Use Case Template: http://www.cse.msu.edu/~cse435/Homework/HW4/Use-Case-Template.docx

3. (7.10) What do you think happens when requirements validation uncovers an error? Who is involved in correcting the error?
