Michigan State University
Spring 2017
Project Overview

• Create a chat bot capable of automatically providing related documents according to user’s questions or problems.
• If no documents are found, chat bot will provide options for user to report a bug.
• Chat bot will do self training according to the feedback users provide after using the bot.
• Provides real time solutions for problems without the need for human intervention.
System Architecture

Diagram showing the integration of Azure, Direct Line API, api.ai, and GitHub Search API with a client and bot.
Finding an article

Here are some articles that I think will help you.

[Enroll your device in Intune all](https://docs.microsoft.com/en-us/intune/EndUser/enroll-your-device-in-intune-all/)
